

MOHAMAD AMIRUL AIZAD BIN ROSLEE

Bandar Tasik Selatan, Kuala Lumpur • 017-4621544 • amirulaizad544@gmail.com

SUMMARY

Fresh Software Engineering graduate with internship experience in full-stack web development, backend automation, and cloud application development using Google Cloud Platform (GCP). Proficient in PHP (Laravel), Python, JavaScript, Next.js, MySQL, and RESTful API development. Experienced in developing scalable web applications, automating workflows, and integrating cloud services. Passionate about building reliable, user-focused software solutions and continuously expanding technical expertise.

EDUCATION

Bachelor of Software Engineering with Honours

September 2022 - Present

Sultan Idris Education University

- Dean's Award: Semester 1, 2, 3, 4, 5, 6 and 7
- CGPA: 3.87

Engineering Foundation

July 2021 - June 2022

MARA University of Technology

- CGPA: 4.0

SKILLS

- **Programming Languages** : PHP, Python, JavaScript, Dart, Java, C++, SQL, HTML5, CSS3
- **Backend Technologies** : Laravel, RESTful APIs, JSON
- **Frameworks & Libraries** : Laravel, Livewire, Next.js, Flutter, Tailwind CSS
- **Database** : MySQL, Supabase, phpMyAdmin, Firebase
- **Cloud Technologies** : Google Cloud Platform (Cloud Functions, Cloud Storage)
- **Tools** : Git, GitHub, Postman, Composer, SVN, Jupyter Notebook, IIS
- **Design & Creative** : Figma (UI/UX), Adobe Photoshop, Adobe Illustrator
- **Languages** : English (Fluent), Malay (Native), German (Basic)

WORK EXPERIENCE

Software Engineer Internship, Kasatria Analytics Sdn. Bhd.

March 2026 - August 2026

- Built and maintained full-stack web applications using Laravel, Python, JavaScript, and MySQL, focusing on scalable and maintainable solutions.
- Built Python automation scripts to streamline data processing and reduce repetitive manual tasks.
- Developed and maintained cloud-based applications on Google Cloud Platform (GCP) using Cloud Functions, Cloud Storage, and related services.
- Designed and integrated RESTful APIs to enable secure communication between frontend applications, backend services, and cloud infrastructure.

Working Student Scheme, Co-curricular center, UPSI

January 2025 - August 2025

- Supported IT operations and digital content production to improve internal workflow efficiency and communication.
- Designed promotional materials for university events using Adobe Creative Suite to increase event visibility and student engagement.
- Created and managed digital content for university social media platforms to strengthen online engagement.

Store Staff, 5 Sen Sdn. Bhd

2020

- Assisted customers with product selection and inquiries while delivering efficient and professional customer service.
- Processed cash and card transactions accurately using POS systems while maintaining reliable financial records.
- Organized product displays and maintained store presentation to improve customer shopping experience.

PROJECT

User Journey Builder

(2026)

- Designed and built a two-part system for documenting and specifying user journeys: a Chrome extension that captures full-page website screenshots and enables users to annotate specific interactive elements, identifying the precise actions required to complete a workflow.
- Developed a companion configuration platform enabling teams to define detailed parameters for each annotated element, automatically generating a presentation-ready slide deck that visualizes the complete user journey.
- Built a parallel export feature that compiles the same specification data into a structured Excel tracker, enabling stakeholders to analyze and cross-reference every marked element's defined behavior.

Resource Cleanup & Audit System

(2026)

- A cloud cost-governance tool that scans Google Cloud projects to find unused or forgotten resources, old Cloud Run revisions, orphaned storage folders, and unused container images that quietly rack up cost over time.
- Runs as a multi-service pipeline that can audit multiple projects at once without timing out, and safely handles cleanup by keeping essential resources (like the active revision) while flagging the rest for review.

EcoQuest Project (Degree Final Year Project)

(2025)

- Developed EcoQuest, an AI-powered Flutter mobile application that promotes biodiversity education through interactive species recognition.
- Implemented AI-powered image recognition to identify flora and fauna and display relevant biodiversity information.
- Designed gamified learning features including quizzes, achievements, and digital species collections to improve user engagement.

Hostel Registration Portal

(2025)

- Developed a web-based Hostel Registration Portal to streamline student hostel registration and administrative management.
- Built using Laravel, Livewire, Spatie Permission, and MySQL with support for individual and group registrations.
- Implemented automated group registration workflows, status tracking, and an administrative dashboard for hostel management.

Innovation Competition

(2025)

- Awarded First Prize in the Gemini No-Code Hackathon for developing an inclusive campus navigation solution.
- Developed an accessibility-focused mobile application featuring campus navigation and an SOS emergency assistance function for wheelchair users.

EXTRACURRICULAR

2025

- First Prize winner in Gemini NO-CODE Hackathon Competition.
- President, UPSI Software Engineering Association, Session 2024/2025.
- Program Director for Celik Digital MADANI Orang Asli.

2024

- STEM Program Leader Award, 17th Residential College Awards Ceremony
- Media, Publicity and Public Relations, Student Council of Harun Aminurrashid College, Session 2023/2024.
- Program Director for National Innovation and Creativity Competition 24'.
- Program Director for National Malaysia MADANI Robotics Challenge 2024.
- Delegation Member for Global Outreach UPSI to Vietnam.
- Delegation Member for Beyond Borders: Humanitarian Mission UPSI for Indonesia 2024

CERTIFICATES

- Google Ads Professional Certification
- Google Analytics 4 (GA4) Certification
- General Assembly User Experience Bootcamp
